

Press Release

Formation of Global Passive Safety Systems India (P) Ltd

The Abrams family, founders-promoters of the product known as Smart Hose are proud to announce the formation of Global Passive Safety Systems India (P) Ltd as in collaboration with Mr H. S. Gupta & Mr Suyash Gupta, of HT Process Controls (P) Ltd, to take customer service at an entirely new service level with localized assembly and production of the safest hose and fluid transfer system within India, to be sold under the name of **Global Passive Safety Systems India (P) Ltd (GPS²)**.

Localizing production is a step necessary to make the product more affordable for the safety conscious Indian customer. The line of manufacture would have offerings for **GPS² for LPG plants and AUTO LPG outlets, GPS² for Anhydrous Ammonia, GPS² for aviation fuel, GPS² for Industrial gas applications and all chemical applications.**

"We are confident that with this step will enable us to more cost effectively and logistically deliver this highly important safety product to the Indian market place." said Suyash Gupta, Managing Director for GPSS-I. "The decision to expand our business activities directly into India is a win-win situation for our organization and India," said Andy Abrams, Director of GPSS-I. "The country's resources and proximity make it an ideal location for us to continue the momentum of safety through our new manufacturing and services division and the new center will bring new business and jobs to the community."

About SHT (P) Ltd

Global Passive Safety Systems is formed to take the next steps by providing, on a geographical basis, reliable, readily deployable and cost effective improvements in industrial safety. As the name declares we are a Global Company that is based upon the extensive experience of its founders and joint venture partners and believes that significant and measurable enhancements to industrial safety are achieved with deployment of "passive devices". The essence of our mission is to increase the safety of all operations and facilities through the deployment of systems such as the "Smart-Hose" and others.
