LIFEGUARD TECHNOLOGIES AND HYDRASPECMA WIRO AB ANNOUNCE GASTECH 2022 MILAN EXHIBITION PARTICIPATION

First post-pandemic exhibition attendance, displaying the entire range of Hydrogen safety hoses & systems

NEWTOWN SQUARE, PA – August 9, 2022 - **LifeGuard Technologies**, the world's leading manufacturer of safety hoses, and **HydraSpecma Wiro AB**, LifeGuard Technologies' European manufacturing joint-venture partner, announced today their attendance and presentation at the **Gastech 2022 Exhibition** in Milan, Italy. LifeGuard Technologies' first in-person conference attendance since early 2020 will be at this exhibition, which runs from **September 5th to September 8th**.

Gastech 2022 Milan, the largest exhibition of its kind supporting the gas, LNG, hydrogen, and energy industries, allows exhibitors to demonstrate the value they bring to the industry. Gastech's exhibition in Milan will celebrate its 50th anniversary by showcasing new global products, solutions, and technologies from across the industry. **Andy Abrams, executive vice president of LifeGuard Technologies** stated, "With the rapid expansion of hydrogen as a source of clean energy and the contemporaneous establishment of the LifeGuard Safety Hose as a standard for transferring gaseous hydrogen, we believe that this conference will prove to be a catalyst for our industry to learn more about and even adopt a similar standard of improving safety."

The founders of LifeGuard Technologies and HydraSpecma, who will share a booth at the exhibition, have collaborated for nearly 30 years. HydraSpecma, LifeGuard Technologies' first overseas assembly center, recognized the importance of safety hose technology more than three decades ago. With many of their high-pressure hoses produced in HydraSpecma's factory, the joint-venture partnership has effectively delivered the LifeGuard safety hose technology on a global scale. "We have been working together with LifeGuard Technologies for 30 years now and this is a very good complement to our conventional high pressure gas hoses, because in this area, it is all about safety, explained **Claes Lofgren, Sales Manager at HydraSpecma Wiro AB**. We are happy to be one of few approved assembly centers of LGT hoses in the world and we can see an increasing need, both of our conventional hoses and LifeGuard Safety Hoses in the market."

This exhibition marks LifeGuard's expansion of manufacturing in Europe, which now includes their entire range of hydrogen hoses. At this show, "LifeGuard Technologies will be the only company to present a complete range of hydrogen hoses from vacuum- jacketed liquid transfer hydrogen hoses to ten thousand psi to cryogenically flexible low permeability hydrogen delivery hoses," stated **Andy Abrams, executive vice president of LifeGuard Technologies**.

LifeGuard Technologies and HydraSpecma Wiro AB are looking forward to reconnecting with some of their existing European clients, presenting their full range of hydrogen hoses, and speaking with prospective customers about the benefits of implementing a LifeGuard Technologies' Hydrogen safety hose within their organizations.

About LifeGuard Technologies

LifeGuard Technologies' mission is to provide, on a geographical basis, reliable, readily deployable, and cost-effective improvements in industrial safety. LifeGuard Technologies is a Global Company that is based upon the extensive experience of its founders and joint venture partners and believes that significant and measurable enhancements to industrial safety are achieved with distribution of "passive devices". The essence of our mission is to increase the safety of all operations and facilities through the utilization of systems such as the "LifeGuard Safety Hose" and others. LifeGuard manufactures its hoses in the USA, Canada, Sweden, India, and Australia.

About Hydra Specma Wiro AB

HydraSpecma Wiro is a company in the HydraSpecma Group with headquarter offices in Denmark. With factories all over the world, Hydra Specma Wiro mainly deals with Hydraulic components, welding, bending pipes and systems for the Automotive, Wind and after-market. HydraSpecma Wiro are specialized in metal hoses, PTFE hoses, manipulated pipes and high-pressure gas hoses. Please visit www.hydraspecma.com for more info.
